

Sponser Low Carb Burner 20 x 6g à 500ml

Low Carb Burner - the fitness drink with only 14 kcal/500 ml. Enriched with metabolism-activating substances such as L-carnitine, green tea and coffee extract, it is also suitable as an accompaniment to a diet.

CHF 25.00

The acid-free and mildly flavored LOW CARB BURNER by Sponser® is your ideal companion during sports sessions with the goal of losing weight and/or training the fat metabolism. LOW CARB BURNER contains no carbohydrates, but electrolytes and functional ingredients such as green tea and coffee extract, L-carnitine and choline. The tasty electrolyte drink provides only 40 kJ (10 kcal) per serving. The handy portion bag you can easily take anywhere: To the gym, to work or for endurance training.

The combination of different active ingredients aims to activate your fat metabolism and thermogenesis. Choline contributes to normal fat metabolism, while zinc supports normal metabolism of fatty acids. Optimal fat burning favors increased energy utilization and thus calorie burning of your body. The catechins from green tea extract and the polyphenols from green coffee extract support these processes.

LOW CARB BURNER is formulated to be carbohydrate-free and therefore virtually calorie-free. The usual sports drinks, on the other hand, serve as a targeted energy supply, but their energy content, usually with a high GI, prevents optimal fat burning. They are thus central to performance in competition, but not optimal for training in the fat metabolism range. Conventional sports drinks are therefore also not suitable for supporting activities with the aim of losing weight. Conversely, unlike LOW CARB BURNER, pure water contains no functional ingredients and also few electrolytes.

Packaging unit: Box 20 x 6g à 500ml
Flavor: Wild Berries

Content: 120g
