

Finnlo BioForce Extreme Core (3848)

The Finnlo Bio Force Core - **with resistance up to 125kg** - the revolution in strength training! Instead of conventional weight blocks, the Bio Force strength station works with space-age TNT resistance technology. The nitrogen-filled cylinders generate uniform resistance and work completely silently. New - now with 2 x AB loops and 1 x AB strap.

CHF 1'499.00

Adjusting the Finnlo Bio Force is very easy: the slide and lock mechanism allows you to adjust the **resistance up to 125 kg** (up to 62.5 kg for bilateral training) in 2.5 kg increments with a single movement, without having to get up from the weight station. The differentiated resistance setting of the weight station also allows the weaker half of the body to be compensated for while performing the same exercise.

Together with the ingenious cable pull system and the many adjustable pull positions, the Bio Force strength station offers a total of over 100 different exercise options. The four pull points per side at shoulder height enable four different training widths for chest and arm training and therefore a targeted muscle approach. Two foot straps for extensive training of the lower extremities are included. Adductors, abductors and the rear leg muscles can be easily trained. The seat can be easily removed for standing or kneeling exercises. As a guide, all exercises are structured and listed with descriptions and photos in the enclosed manual.

Perfect for at home: The Bio Force Extreme weighs only 78 kg and can be easily moved around the room using the transport wheels.

Features:

- Weight type: nitrogen cylinder with resistance setting from 5 to 125kg adjustable in 2.25kg increments (for bilateral training 2.5 to 62.5kg). The resistance of this innovative TNT system (Total Nitrocell Technology) is generated by the compression of nitrogen
- A total of over 100 different exercise options
- Silent and even resistance
- Easy resistance adjustment via slide-lock mechanism without having to stand up

- Bilaterally different weight settings (2.5 - 62.5 kg) enable targeted compensation of muscular weaknesses
- 4 rope pull points per side at shoulder height for targeted activation of the upper body muscles
- with pull-up handles
- 1 user
- 5-way adjustable backrest
- Space-saving, modern design
- Height-adjustable, removable seat cushion
- Quality upholstery
- Tablet holder: variety and motivation through music, films and videos (tablet not included)
- transport castors
- Color: anthracite lacquer, black upholstery with embroidered logo
- Target price CHF 1'699.--

Use: home use, payload: approx. 135kg

Equipment dimensions L134 x W168 x H218cm, training dimensions: L180 x W228 x H230cm, weight 80kg

Accessories: lat pull-down bar, hand pull-down loops, 2 x AB loops, AB strap, training instructions with over 100 exercises

Option: Bio Force accessory set, Power Bench

Warranty: 2 years on labor and spare parts (excluding travel time and consumables such as pads/cables)
