

Pull handle with aluminum handle (NB59A)

Nylon pull handle with aluminum grip and with 4 suspension eyes - with the Body Solid NB59A aluminum stirrup handle any home gym, functional trainer or cable crossover equipment sinbnvoll ergänzt and opens an almost unlimited amount of training possibilities.

CHF 27.50

The Body-Solid NB59A Aluminum Rise Bar Handle is designed for use on cable, pulley or selectorized weight fitness equipment that allows users to perform multiple one- or two-handed resistance exercises, including presses, crossovers, pulldowns, rows, delta lifts and more.

The NB59A offers convenient length adjustment thanks to integrated D-rings that allow users to lengthen or shorten the distance from the attachment point to the handle. The durable steel D-rings also attach quickly and easily to carabiners or other equipment attachments.

The NB59A's ergonomically designed, textured aluminum handle is lightweight and comfortable and provides a consistent grip during exercise.
