

All Stars Protein Water 12 x 500ml

Protein concentrates are low in fat and carbohydrates, so they can be used in any diet. Whey protein (whey protein) is the most popular protein supplement in sports because it has the highest biological value (about 104) and the fastest availability. The high content of branched-chain amino acids (BCAAs) can have a muscle-protecting and regeneration-promoting effect. Wheyprotein is therefore particularly suitable for the times before and after training, as well as early in the morning. Whey protein is available at ALL STARS as concentrate (100% WHEY) and isolate (ISOLATE/ISOWHEY).

CHF 39.60
