

Horizon Fitness Andes 7.1 Elliptical Ergometer

The slim, elegant elliptical trainers in the Andes series combine performance and comfort and offer you an intensive full-body workout that is easy on the joints. The ergonomic design enables natural and effective workouts. And after training, the machine can be folded up effortlessly in just one easy step to save space. The Andes 7.1 elliptical ergometer with induction brake system offers a total of 14 training programs, including two pulse-controlled programs, one (speed-independent) watt-controlled program (25 - 400 watts adjustable in 5 watt increments) and one user program. The front drive and the wide and flexible pedals support natural movement. Thanks to the FEATHERlight folding system with One-Step folding and EasyLift handle, the Horizon Fitness Andes 7.1 crosstrainer can be folded up to save space.

CHF 1'890.00

DURABILITY MEETS COMFORT

Get the stability of a conventional elliptical trainer combined with the space-saving advantage of the FEATHERlight folding system. Thanks to hydraulic support, you can raise or lower the running rails effortlessly. Enjoy a natural training experience. With the six well thought-out design elements of our SIXSTAR frame, our elliptical trainers move in harmony with you - and not the other way around.

THE NATURAL ELEMENTS OF MOVEMENT

Enjoy a natural training experience. With the six well thought-out design elements of our SIXSTAR frame, our elliptical trainers move in harmony with you - and not the other way around.

Features:

- Induction braking system
- FEATHERlight folding system with One-Step folding with EasyLift handle

- Reinforced and noise-optimized running rails
- 8.5 kg flywheel
- Adjustment options on the arm bars - Quick Control (console control)
- Training computer with 6.25 blue backlit LCD window with display of watts, timing, training distance, speed, resistance, calories burned, heart rate, revolutions per minute and watts, profile
- Performance HR Wheel display
- Graphic display of the load profile
- 30-stage electronic adjustment and display of the selected resistance
- 10 training programs (manual, interval, game, FitTest, weight reduction, weight reduction plus, endurance, reverse training, random)
- 2 pulse-controlled training programs (target heart rate, % target heart rate)
- 2 watt-controlled training programs (watts, interval watts) (25-400 watts in 5-watt increments)
- User program
- Direct selection buttons
- Hand pulse sensors on the center handle
- Forward and backward motion sequence for different muscle strain
- Ergonomic handlebars for upper body training
- Q-factor (pedal distance): 20mm (ESQF) - The Q-factor describes the pedal distance. The models in the Andes series have ESQF (Extra Small Q-Factor) with a distance of less than 100 mm. While the distance between the feet is 120 - 150 mm when walking, it is less when running and is 80 - 100 mm. A low Q-factor offers advantageous ergonomics for running training on the elliptical trainer
- Stride length 50.8 cm
- Ascent height 26.6 cm
- quick start
- Non-slip treads
- motion-dynamic pedals (APS)
- transport rollers
- height adjustment
- Power supply via adapter
- Energy-saving mode
- Smart device holder
- Water bottle holder
- Sonic surround speaker
- Audio in/out socket
- Compatible with popular fitness apps like @Zone, Kinomap*, Zwift
- Bluetooth FTMS
- @Zone-APP* - compatible - with @Zone you can jog through exotic locations on virtual journeys, compete with people all over the world, redefine your fitness with Sprint 8 HIIT and constantly set yourself new challenges with goal-based workouts. The training progress can be documented to make progress visible. If you like, you can even compare your own performance with the best @Zone users worldwide. The app can now be downloaded free of charge (App Store and Google Play).
- Kinomap-APP** - compatible - the Kinomap-APP turns training into a motivating, interactive training experience, whether alone or in competition mode. Over 170,000 varied route kilometers for the various sports have already been uploaded by users
- recommended retail price CHF 2'099.--

Use: home use, payload: approx. 136kg

Device dimensions: L174 x W68 x H171cm, folding dimensions: L102 x W68 x H171, weight 79.5kg

Accessories: integrated receiver for chest strap transmitter, hand pulse sensors

Options: Heart rate transmitter belt

Warranty: 2-year full warranty

@Zone-APP*

The free @Zone-APP connects your smartphone or tablet (iOS/Android) to the treadmill via Bluetooth. Little effort, maximum success - with the exclusive HIIT training program Sprint 8, amazing results in terms of general fitness and fat burning are achieved with three short training sessions per week. **Once around the world** - Virtual Active synchronizes high-resolution film footage of real routes with the speed and intensity of the workout. The incline or resistance changes automatically and adapts to the landscape profile on the screen. Every month, 300 minutes of this program are included free of charge in the @Zone app. **Target training programs** - with the 5 target-based training programs (time, distance, calorie consumption, pace and target heart rate) you can always set yourself new challenges and increase your performance in a targeted manner. **Workout tracking** - All data is summarized in the training history so that progress from training to training is documented. If you like, you can even access the worldwide leaderboard to compare your own performance with the top users of @Zone.

Kinomap APP*

The Kinomap APP turns training into a motivating, interactive training experience. The app provides videos for cross trainers, ergometers, treadmills and rowing machines. The Kinomap APP is connected to the training device via Bluetooth. Choose a route and cycle, run or row as if you were there yourself. You can track your progress on the map. As the videos are geocoded, the APP also adapts the resistance (only on selected models) to the terrain profile of the training route.

Train more than 170,000 km alone or in competition with others - the Kinomap videos are uploaded by users. There are already over 170,000 kilometers of varied routes available for the various sports. All videos are marked with location data, so you can not only watch the video, but also see on the map where you are and what the terrain profile looks like. The app also displays the most important training data during the workout so that you can keep an eye on your performance while you are running through Central Park, for example. The multiplayer sessions are also particularly challenging, where you can take part in public races or arrange to meet up with friends for a little race. Kinomap is available in a free basic version from both Google Play and the AppStore. There are various license models for the full version.

Brake system: Induction brake system

Flywheel: 8,5 kg

Stride length: 50.8 cm

Gradient: No

Resistance levels: 30

Training computer: LCD display

Displayed values: Watts, timing, training distance, speed, resistance, calories burned, heart rate, revolutions per minute and watts, profile

Training programs: 10

Pulse-controlled programs: 1

User-defined programs: keine

Hand pulse sensors: Yes

Pulse receiver: Bluetooth
