

Synca CirC Plus Massage Chair Anthracite

At first glance, you might think the CirC plus is just a fancy chair. But once you experience the massage that reaches from the gluteal muscles to the neck and shoulders, feel the soothing warmth, enjoy the reclining comfort and discover the easy operation with the wireless remote control, you will love this massage chair. The so-called "Zero Gravity Position", a reclining position determined by NASA, in which the legs, heart and back are at the same height, offers ideal conditions for a relaxed, almost weightless posture. The 4 massage rollers follow a 115 cm long SL-shaped curved guide rail. This allows you to enjoy the relaxing massage from the lower neck, over the back to the buttocks and thigh area. Lateral air cushions in the hip area provide additional relaxation with gentle compression. All functions and programs can be found intuitively on the wireless remote control, which then disappears discreetly in the side pocket.

CHF 2'390.00

- Built-in transport wheels
- 8 automatic programs plus manual and spot settings

Therapeutic massage at home

SYNCA combines a unique wellness experience with advanced design. The innovative massage products allow you to experience pure relaxation and well-being - in the comfort of your home.

Synca is inspired by the Japanese word (pronounced Shinka). It means evolution, but in another spelling it also means valuable. Both perfectly describe the philosophy behind Synca. We develop luxurious wellness products and invest energy, know-how and heart and soul to constantly improve them and achieve our goal: Your ultimate physical and mental relaxation. Because we know how valuable your time is.

Synca combines the Far Eastern tradition of massage with innovative, precise technology "Made in Japan" and modern design. You can enjoy the big and small moments of relaxation at any time in your home thanks to Synca's premium products.

Professional massage for optimal relaxation

The Synca CirC massage chair massages gradually from the buttocks to the thighs, starting with a gentle tapping massage. The next step is a deeper kneading massage to counteract tension and blockages in the pelvic area. The lateral air cushions in the pelvic area provide additional relaxation of the muscles with their gentle compression.

L-Shape massage

The L-Shape massage provides pure relaxation - exactly where you want it. Here, the "massage hands" stroke along an 86cm-long guide rail from the lower neck, over the back and into the buttocks and thigh area. With the CirC massage chair, you can conveniently choose between full body, back, hip or buttock massage at the touch of a button. There is also the option to focus on a specific area or point of your body.

Customize the massage to your needs

Synca's massage chair massages gradually from the buttocks to the thighs, starting with a gentle tapping massage. The next step is a deeper kneading massage to relieve tension and blockages in the pelvic area. The intelligent massage imitates the massaging of a real masseur and makes you feel as if you are being massaged with real hands. The strength can be adjusted according to your preferences from strong to pleasantly gentle.

With the Synca CirC massage chair, relaxation is pre-programmed

Enjoy an individual massage according to your personal needs with the CirC massage chair. With the intuitive remote control you have fully automatic, as well as various manual or selective programs available at the touch of a button.

Buttock and pelvic therapy

The muscles in the lower back and pelvic area represent an important supporting apparatus. This is particularly closely linked to the leg and vertebral muscles. Tense or stiff muscles in the pelvic region can cause pain and dysfunction in the lumbar region, lower back as well as the hips. The CirC massage chair loosens your tense and stiff muscles.

Soothing heat therapy

The regenerating heat penetrates the whole body from the waist to the back and enhances the effect of the massage. Experience soothing comfort like in a real spa.

Modern and timeless interior design

The massage chair attracts all eyes with its noble design. The design blends seamlessly into any living space. And because the CirC is so wonderfully compact, you need very little space to bring a piece of luxury into your home.
