

Micro electric scooter Explorer II (EM0081)

35 kilometers of range and a rated motor power of 350 watts make the Micro Explorer II the perfect last-mile solution in city traffic. The large footboard with non-slip rubber coating, the height-adjustable handlebar and the front and rear wheel suspension ensure a comfortable ride, even on uneven surfaces. The e-scooter can be folded in seconds with a kick of the foot, making it easy to stow in the trunk or combine with public transport.

CHF 999.00

- Intuitive foot folding mechanism
- Front & rear suspension
- Integrated display
- Handbrake with integrated bell
- Height adjustable handlebar
- 16+ (14-16 years with driver's license category M)

Maximum safety is ensured by the three different brake mechanisms, homologated front and rear lights and side reflectors. The motorcycle-like throttle twist grip and the integrated display in the center of the handlebars provide additional riding fun. Connect your e-scooter with the Micro App and keep an eye on the most important riding information such as battery status, speed or distance at all times.

The Micro App connects via Bluetooth and displays the total distance, riding time and turn-by-turn navigation in addition to changing the riding mode. Furthermore, the app has a diagnostic mode that simplifies the service process and also contributes to the longevity of the product. In addition, the e-scooter can be locked with the app and, together with the micro lock available as an accessory, is doubly protected against theft.

Ideal for: City & Commuting, Long Distance, Sports & Leisure, Nature Trails, Shopping & Excursions

Age: Adult

Dimensions Folded: 90x15x34cm

Product Weight 13kg
