Perfect for your workout and challenge. **BLAZE** is invigorating and fruity fresh in taste.

CHF 49.90

Maximum caffeine boost

With 160mg of caffeine in combination with niacin and green tea extract, **BLAZE** unfolds its stimulating effect on body and mind, and promotes fat metabolism. Caffeine has many positive properties that athletes take advantage of. Its intake stimulates the circulatory system, respiration and the central nervous system. Caffeine helps to improve concentration as well as endurance performance.

Niacin

Niacin plays a particularly important role in the body's energy supply, as it is involved in protein metabolism as well as fat and carbohydrate metabolism. In addition, niacin is important for the recovery of our body. It is particularly important for muscle regeneration.

L-Carnitine

L-Carnitine is a vitamin-like nutrient found in energy and fat metabolism and contributes to energy production through the transport of fatty acids during sports.

L-Tyrosine

- Tyrosine promotes dopamine formation. Dopamine is a nerve messenger and belongs to those hormones that are also commonly referred to as "happiness hormones".
- Tyrosine makes you creative
- Tyrosine increases reactivity
- Tyrosine reduces stress
- Tyrosine keeps the brain efficient

Vitamin B6

- contributes to a normal energy metabolism
- contributes to normal protein and glycogen metabolism
- contributes to a normal function of the nervous system
- contributes to a normal function of the immune system (physical defense)
- contributes to normal mental function
- contributes to the regulation of hormonal activity
- contributes to the reduction of tiredness and fatigue
- contributes to normal formation of red blood cells
- contributes to normal homocysteine metabolism
- contributes to normal cysteine synthesis
- Directions
- One can before exercise or as a "pick-me-up" at any time of day.
