

## VLUV SOVA KAPSUL Balance Capsule, Salmon

The new VLUV KAPSUL combines air-sprung, dynamic sitting like on a VLUV BOL seat ball with the compactness of a stool. Completely different, and yet so similar. You balance yourself automatically and intuitively. The deliberate instability allows plenty of movement and activity, yet you still feel safe and comfortable.

CHF 149.90

### **Slimmer silhouette**

Slimmer footprint than a sitting ball. Ideal for small tables.

### **Stand-up function**

Factory-installed floor weight - always swings back.

### **Bounce & balance effect**

Liberated, dynamic sitting that is active in all directions.

### **More legroom**

Improved mobility and easier to climb over.

### **gripME**

The typical VLUV signature handle for easy carrying.

### **Anti-slip coating**

Silicone coating on the standing surface to prevent slipping.

### **Features:**

- minimalist design in capsule shape
- Narrower silhouette - takes up less space
- Motivates you to sit upright and straight
- Constant unconscious movement and balance

- Typical bounce & balance effect like a sitting ball
- The world's first air-filled sitting stool
- Moves like a sitting ball, but 40% slimmer
- Upright, more concentrated sitting position
- perfect bounce & balance
- more legroom like a sitting ball
- including floor weight = stand-up effect
- non-slip base with silicone coating
- Cover made from robust yet soft polyester furniture fabric
- Abrasion resistance: over 90,000 (Martindale)
