

Fitwood climbing bow LUOTO black

LUOTO climbing arch is a multifunctional children's furniture. It is designed to promote active play and the diverse development of motor skills, coordination, balance and strength. Climbing fulfills children's natural need to learn new things, and climbing is a wonderful way to become physically active and increase children's self-confidence.

CHF 390.00

The LUOTO climbing arch has many other functions besides climbing:

- Seesaw
- Play castle
- Baby gym
- Gate
- Children's table
- Toy storage
- Side table

Turned upside down, the LUOTO climbing arch serves as a seesaw - perfect for little pirates to travel or as a dreamy nest for naps. For this purpose, we recommend the KAURA cushion, which makes the use of the arch as a seesaw safer and more comfortable.

In addition to functioning as a climbing arch in its original arch position, LUOTO can also be used as a play castle, gate or baby gym. Cover it with a blanket and place a pillow underneath to turn it into a play castle, or hang sensory stimuli on some of the top rungs to turn it into a baby gym. In its curved position, LUOTO also makes a perfect indoor soccer goal or a goal for just about any fun or game kids can dream up!

When the climbing arch is turned on its side so that the back of the arch is facing up, it can also be used as a table. Place it against the wall to use as a side table, or combine it with a small stool to use as a kids' table for painting, crafts and games.

If you turn the arch on its side so the back faces the floor, and push it against a wall (or another LUOTO

arch), it becomes a toy storage unit. Ideal for large stuffed animals or for pillows and blankets!

The climbing arch can be used from 0-9 years:

- 0-12 years it can be used as a baby gym, seesaw or support for learning to crawl and stand
- 1-5 years it can be used as a climbing arch, seesaw, play castle, goal, etc.
- 6-9 years can use it as a table, seesaw, play castle, goal, etc.

As a side table, the LUOTO is suitable for children and adults of all ages!

The frame of the LUOTO climbing arch is made of birch plywood from sustainable forestry, the rungs are made of aspen from sustainable forestry.

The optional KAURA cushion is made of 97% recycled fabric (84% recycled cotton, 13% recycled polyester and 3% cotton - Standard 100 by Oeko-tex) and is made with 60% recycled polyester and 40% foam chips (may contain individual down).

Please note that the birch color of the LUOTO climbing bow has been treated with translucent wax to enhance the natural light tone of the birch wood.

Dimensions: W100 x D60 x H54cm

Weight 10kg

Payload 60kg

Finish: stained black

LUOTO climbing bows are designed in Finland and manufactured in the EU. Patented original design. KAURA cushions are designed and manufactured in Finland. Both are designed to support an active lifestyle without compromising design or sustainability.

Please note that a slight bend will protect the joints of the climbing bow if it is used often. Use the climbing bow on a non-slip surface. Small children should only use the climbing bow under adult supervision.
