

Fitwood slide ramp TUOHI

TUOHI slide ramp is a fun and versatile product that can be combined with the climbing arch Luoto and the wall bars that you can find in our range. The slide ramp has two sides, one for sliding and the other for climbing. Thus, the slide ramp takes the fun to a new level, while the familiar climbing arch and wall bars take on new dimensions. TUOHI is easy to use and requires no fixed installation. The inclination of the slide and climb ramp can be changed in an instant by placing it on the desired rung.

CHF 149.00

The slide ramp is designed to improve children's coordination and motor skills while encouraging them to play freely and creatively. The only limit is the imagination of what this slide ramp can become - little birds can zoom down the ramp to start their adventures for the day, or rally drivers can race to see whose car goes the fastest down the hill. Playing together builds kids' social skills, and our versatile slide ramp ensures there's never a dull moment.

The TUOHI slide ramp is made from sustainably produced, high quality birch plywood.

Dimensions: L120 x W40 x D5.8cm

Weight 7kg
