

FluidExercise E750 Cycle UBE

The FluidExercise E750 Cycle upper-body ergometer (UBE) is a high-quality, commercial-grade machine that offers maximum versatility of use, including recumbent cycling and bi-directional upper-body-arm riding while seated or standing. The E750 features a dual-function pedal cage, foot straps and ergonomically designed handles for upper body use. The E750 resistance is adjusted via the patented twin-tank system with adjustable fluid resistance in 10 levels and the speed is controlled by the user. The E750 remains silky smooth and consistent at very low RPMs and is capable of handling the high speeds of a HIIT workout. This wide variation in load and speed options allows you to effectively train according to any workout program. If needed, the low-profile seat can be rotated 90 degrees for easy entry and exit. This unique feature is ideal for deconditioned and rehabilitation athletes.

CHF 3'690.00

The FluidExercise E750 Cycle UBE upper body ergometer is suitable as a recumbent ergometer for lower body training and upper body trainer for training and rehabilitation. The upper body workout can be performed standing or sitting.

The FluidExercise E750 Cycle UBE upper body ergometer offers options to work virtually any muscle group, target strength, build endurance and restore stability, flexibility and balance.

Features:
