

Micro Micro Trike 360 Plus Aqua (TR0017)

The most compact stroller in the world

CHF 299.00

The Micro Trike 360 Plus is the ultra-light alternative to the conventional stroller. Thanks to its compact folding dimensions, the stroller can be conveniently stowed in any trunk and fits easily into the overhead compartments of airplanes and trains. The 360-degree swivel seat is particularly practical. If the seat points forward, the child can explore the surroundings; if it points towards the parents, personal interaction with the child is possible. The seat back can be fixed at either a 95 or 125 degree angle. In the upright position, the Micro Trike 360 Plus also serves as a child's high chair for eating. The padded 5-point harness and front bar guarantee a safe sitting position for the child at all times. The front swivel wheels provide optimal maneuverability and can be locked if necessary. The rear wheels are equipped with a shock-absorbing double-sided parking brake.
