

## Fluid Rower Evolution E550 Water Rower Machine

The Fluid Rower E550 is Fluid Rower's largest model and is designed for home to commercial gym use. The shorter length, higher seat and power of the water rower provide robust performance, perfect for any fitness level. The Fluid Rower E550 rower offers unmatched natural support and resistance and features the patented adjustable fluid resistance for instantly adjustable resistance. The dual-tank water resistance rowing system offers a tremendous range of resistance for any rower, from deconditioned seniors to professional athletes and personal trainers.

**CHF 3'390.00**

### Equipment:

- Resistance created by water resistance - Resistance created depending on the strength of the pull.
- 10 adjustable resistance levels (Adjustable Resistance (AR)) by means of a rotary knob - Fluid Rower's E550 has a water tank with two separate chambers. There is an active and a passive chamber. Manually (in 10 steps), the water can be transported from the active to the passive chamber and vice versa by opening and closing integrated sluices. Only the water that is in the active chamber is moved during the training. The training resistance is built up on the one hand by the amount of water in the tank and on the other hand by the traction strength of the trainee.
- Auto-Adjust (level on console display adjusts to tank level)
- User-friendly training computer (Interactive Performance Monitor): LCD display for time, 500m average time, distance, strokes per minute, calories burned per hour, resistance level, heart rate, wheel rotation, watts, graphical performance curve
- multiple training programs (quick start, interval, speed and manual training, six preset training programs)
- Bluetooth compatible for integration of rowing and fitness APP's
- Shatterproof polycarbonate tank
- Stainless steel water wheel
- pulse receiver
- adjustable, large foot plate

- adjustable in height (inclined position)
- comfortable, ergonomic and smooth-running roller seat with hidden seat rollers for smooth running
- elevated seat for easy access
- ergonomic handle
- transport wheels
- color: silver

Use: home use to commercial continuous use, payload: approx. 150kg

Equipment dimensions: L195 x W81 x H86cm, space requirement: L315 x W201cm, weight 61.9kg (without water filling)

Accessories: pulse receiver for wireless pulse collection

Options: Transmitter belt

Warranty: home use: 1 year full warranty, 2 years on labor and parts, commercial use: 1 year on labor and parts (excludes consumables).
