

Blazepod RIW (Reaction Intelligence Wall) Pro Bundle

With the Reactive Intelligence Wall, the Blazepod pods are permanently mounted on a wall in the fitness center, physiotherapy or school. Blazepod provides the effective dimensions for mounting the pods. The pods and pod bases can always be removed from the wall, only the wall mounts remain fixed to the wall. This means that the pods are available everywhere.

CHF 769.00

When training on the Reactive Intelligence Wall, athletes always look forwards (as in a competition) and train their reaction with their hands. In addition, pods can easily be set up on the ground to include the feet in the training.

The instructions for the Reactive Intelligence Wall can be downloaded under "Attachments".
