

Style-Fit Bike PRO

STIL-FIT presents the design innovation in bicycle ergometers. The Stil-Fit Ergometer PRO, a technically state-of-the-art fitness machine that fits into any modern living environment with the same sitting and riding experience as a road bike. The elegant matt black design and the new sporty handlebars of the PRO model make the bike an absolute masterpiece. The STIL-FIT ergometer has high-quality details made of the finest materials and the best workmanship. A touchscreen computer ensures simple, intuitive user guidance. Design and engineering from Germany. With the additional Smart package, the PURE ergometer can be used with the STIL-FIT app. Other apps such as Kinomap, Zwift, Rouvy and BKool are also compatible.

CHF 2'690.00

The STIL-FIT Ergometer PRO with its elegant training computer and ergonomic multifunctional handle offers an outstanding design concept. Combined with high-quality materials and a perfect finish, we offer you an exceptional training experience.

The STIL-FIT Ergometer PRO is made for people

- with health awareness
- with high design standards
- who appreciate a beautiful environment at home
- who are interested in sustainable products
- who have limited time available
- who appreciate something special

The aim was to develop the design in such a way that a high-quality living environment and fitness equipment harmonize with each other. The STIL-FIT Ergometer PRO has a clear and minimalist design language. We deliberately integrated as many components from the road bike sector as possible. These

components are of very high technical quality and have a positive effect in the living environment.

Training computer

The PRO is operated via a 4.3 TFT touch screen monitor, similar to a smartphone, which is flush-mounted in the aluminum front. The user guidance is characterized by a clear menu with particularly easy handling and is intuitive. In addition to a variety of preset training programs, you can create up to 5 users and save the corresponding training data. In addition to the quick start function, the STIL-FIT Ergometer PRO offers you various training options. Train in load levels 1-24 as you would in the studio or use the pre-programmed, varied programs. There are various hill programs as well as watt and cardio programs to choose from.

Compatibility with fitness apps

The STIL-FIT ergometer is compatible with the Stil-Fit APP and various training apps such as Kinomap, Zwift, Rouvy and BKool with the optionally available "Smart package". Enjoy a ride on Mallorca's coastal roads, battle your way through the Alps or race with thousands of other users worldwide. With the connection to Kinomap, the pedal resistance adapts to the route profile.

The Stil-Fit APP offers the perfect support for achieving long-term health goals. Varied training programs, setting individual goals, tracking performance development and exporting training data are all made possible by the Stil-Fit APP.

Perfect ergonomics

The ergonomic ONE sports handlebars offer different grip positions and thus ensure a varied workout.

Low Q-factor

The narrow housing ensures an even pedal stroke and a healthy posture.

Tray

The Ergometer PRO has an integrated tablet holder. There is a holder for the smart phone at the top of the handlebars.

Saddle

The saddle can be adjusted horizontally and at an angle. You can therefore set your own individual sitting position. The material is easy to clean. STIL-FIT also uses original components from the road bike sector. This means that you can also fit the saddle of your choice from a bicycle dealer at any time.

Quick release

We use a very high-quality quick release made from CNC-milled aluminum. The surface is black anodized. The height of the seat tube is infinitely adjustable. For easy handling, you will find a scale from 1 - 7 on the front. The seat tube itself is chrome-plated.

Housing

The housing is made of high-quality plastic and painted matt black. All mounting screws are covered by soft caps.

Pedals

The pedals are the elegant "Urban" model with non-slip surface from the German manufacturer ERGOTEC. Of course, you can also fit your own pedals, e.g. clipless pedals from the racing world.

Adjustable feet

The four adjustable feet are individually height-adjustable and have a soft, non-slip sole. This means that the ergometer can be set up safely even on uneven ground and you can train without any problems.

Transport castors

Optional transport castors can be fitted to the rear stand (included). To transport the ergometer, grip the saddle and handlebars from behind and lift it up.

Power supply

The STIL-FIT Ergometer PRO has a generator system which produces the power required for operation. You therefore do not need a power supply unit. This eliminates the annoying cable on the floor.

Features:

- with induction brake from the studio sector
- Wireless generator system (operation without mains connection) - no external power supply
- flywheel mass approx. 10.5kg
- 4.3 TFT touch screen monitor with color display
- 8 training programs: Quick start with 32 load levels with time preselection, 2 cardio programs with upper pulse limit (The CARDIO programs work according to the latest safety aspects. If there is no pulse signal for longer than 1 minute, the system automatically reduces the load). Manual time and max. pulse setting. The starting resistance can be freely selected. 5 training profiles (hill programs) with different levels of difficulty (beginner to advanced) and time, watt program - adjustable in steps of 5 watts with time setting. Speed-independent power control in 5 watt increments from 50-400 watts
- Storage of training data for 5 users
- Stil-Fit app, Kinomap, Zwift, Rouvy, BKool can be used with the optionally available "Smart package"
- Language: German, English
- Transport castors can be fitted as an option (included in the scope of delivery)
- Height-adjustable feet
- Pedals: Ergotec pedal URBAN
- Reduced Q-factor
- Ergonomic multi-position sports handlebar ONE with different grip positions for sporty or upright sitting
- Smartphone holder
- Ergonomic gel saddle in black
- Wooden cover on the handlebar neck in black

- Vertical and horizontal seat adjustment - saddle angle adjustable. Saddle height infinitely adjustable with quick release. Scaling on the front
- DIN class. DIN EN957-1/5, class HA.
- Color: matt black

*The "Smart Package" includes the larger STIL-FIT Ergometer PURE tablet holder, purchase verification code, activation instructions, flyer and enables the use of the new STIL-FIT APP with great new ways to experience training. The use of various external APPs, such as Kinomap, Rouvy, Zwift, BKool. The purchased "Smart Package" is activated via an online form on the STIL-FIT homepage. The user receives unlimited access to all features within 24 hours.

The "Smart Package" is aimed at customers who want to get even more out of their training, are interested in technology, apps, etc. and want to track their performance progress. Setting personal goals, tracking performance development, exporting data, racing and much more - all possible with the "Smart Package".

Application: Home use, payload: approx. 130 kg

Device dimensions: L115 x W50 x H120cm, weight 38kg

Accessories: integrated Bluetooth LE receiver for chest straps, tablet holder, smartphone holder

Option: Smart package, Bluetooth transmitter belt, dual pedals (SPD click pedals combined with flat platform for normal shoes), extended tablet holder (already included in the "Smart package")

Warranty: 2 years on labor and spare parts (excluding consumables)

Brake system: Induction brake system

Current-dependent: No

Horizontal seat adjustment: Yes

Vertical seat adjustment: Ja

Handlebar adjustable: Yes

Pulse-controlled programs: 2

User-defined programs: keine

Hand pulse sensors: No

Pulse receiver: Bluetooth

Accessories: integrated receiver for chest strap transmitter

Options: Bluetooth transmitter belt, floor protection mat

Payload: approx. 130 kg

Insert: Home

Warranty: 2 years on labour and spare parts
