

NOHrD Squat Rack Vintage Oak

Patented technology for a demanding workout in timeless elegance - the SquatRack from NOHrD has a unique design with a solid wood frame consisting of two slim columns that can be pulled out or folded in with absolute ease. This innovative, space-saving design makes it possible to adjust the distance to the length of the handle. The folding and securing mechanisms have been designed to adjust easily and smoothly with your fingertips, ensuring a seamless and hassle-free training experience. The SquatRack from NOHrD is absolutely unique, combining simplicity and aesthetics in a perfect fusion of wood and stainless steel. This extraordinary barbell training device fascinates with its simple elegance and becomes a design highlight in any fitness room or interior.

The design

The NOHrD SquatRack impresses with its unmistakable look. The secret lies in the two slim wooden columns. The rack can be pulled out of the columns with absolute ease. This transforms the SquatRack into a robust training platform that offers all the freedom you need for barbell training.

Barbell training

With the NOHrD SquatRack, you don't just get your muscles in shape. This fitness equipment combines sophisticated training with timeless elegance. An aesthetic statement in every respect - fitness equipment that inspires!

Space-saving

Thanks to the patented mechanism, the SquatRack from NOHrD can be completely folded in and out. The rack can be pulled out of the columns with absolute ease. This transforms the SquatRack into a robust training platform that offers all the freedom you need for barbell training.
