

Blue pod set: Trainer Kit + Podbase Kit 6

Trainer Kit - interactive LED light system for training reaction and action speed. Extremely user-friendly and iOS and Android compatible. Quick to set up and immediately ready to use. Blazepod Trainer Kit with a total of 6 LED light sensors. The pods can be charged with the supplied charging station via USB port. Includes the free BASIC version of the training app (connection with max. 6 pods, 6 own exercises can be saved, access to main exercises in the exercise library) and 6-month trial Pro membership. Podbase Kit 6 - with the PodBase you can train wherever and whenever you want, on any surface and in different weather conditions, and you benefit from improved attachment and pod visibility. The pod is slightly higher and therefore more visible on grass. With the Podbase, the pod is more stable and less likely to tip over when touched.

CHF 649.00

6 LED sensors for training reaction and action speed in sports and fitness. Scientifically proven that athletes with excellent reaction times are more successful than others. Blazepod Trainer Standard Kit provides the trainer with 6 LED lamps that can be placed on the floor.

With the optionally available Functional Adapter Kit, the LED sensors can also be fixed to the wall, attached to posts or suctioned onto mirrors and windows. (Screws for wall mounting not included)

The sensors are operated using your own iOS or Android mobile device. Switch on Bluetooth, install the APP and off you go. The extremely user-friendly APP enables any combination of sensors during training. The sensors are deleted with a light tap or after an individually adjustable switch-off time.

Competitions in teams of 2 with 3 sensors, teams of 3 with 2 sensors each, alone or with whole teams are easily possible. Our tests have shown that we are enthusiastic about using the BlazePod Trainer Standard Kit at all levels. Without any pressure in training exercises or in competitions with other athletes.

- Powerful LEDs with up to 8 color options
- Durability: water-resistant (IP65), UV-protected
- Compact and lightweight design
