

Fitwood climbing arch LUOTO beige

The LUOTO climbing arch is a multifunctional piece of children's furniture. It is designed to encourage active play and the varied development of motor skills, coordination, balance and strength. Climbing fulfills children's natural need to learn new things, and climbing is a wonderful way to get physically active and boost children's self-confidence.

CHF 390.00

The LUOTO climbing arch has many other functions in addition to climbing:

- seesaw
- play castle
- baby gym
- gate
- children's table
- Toy storage
- Side table

When turned upside down, the LUOTO climbing arch serves as a seesaw - perfect for little pirates to travel or as a dreamy nest for naps. For this purpose, we recommend the KAURA cushion, which makes using the arch as a seesaw safer and more comfortable.

In addition to its function as a climbing arch in its original arch position, LUOTO can also be used as a play castle, gate or baby gym. Cover it with a blanket and place a cushion underneath to turn it into a play castle, or hang sensory stimuli on some of the upper rungs to turn it into a baby gym. In its curved position, LUOTO also makes a perfect indoor soccer goal or a goal for just about any fun and games the kids can dream up!

If the climbing arch is turned on its side so that the back of the arch is facing upwards, it can also be used as a table. Place it against the wall to use it as a side table or combine it with a small stool to use it as a children's table for painting, crafts and games.

If you turn the arch on its side so that the back panel faces the floor and push it against a wall (or

another LUOTO arch), it becomes a toy tray. Ideal for large cuddly toys or for cushions and blankets!

The climbing arch can be used from 0-9 years:

- 1-2 years it can be used as a baby gym, seesaw or support for learning to crawl and stand (under supervision)
- 1-5 years it can be used as a climbing arch, seesaw, play castle, gate etc.
- 6-9 years can use it as a table, seesaw, play castle, goal etc.

As a side table, the LUOTO is suitable for children and adults of all ages!

The frame of the LUOTO climbing frame is made of birch plywood from sustainable forestry, the rungs are made of aspen from sustainable forestry.

The optional KAURA cushion is made from 97 % recycled fabric (84 % recycled cotton, 13 % recycled polyester and 3 % cotton - Oeko-tex Standard 100) and is filled with 60 % recycled polyester and 40 % foam chips (may contain individual down).

Please note that the birch color of the LUOTO climbing arch has been treated with translucent wax to enhance the natural light tone of the birch wood.

Dimensions: W100 x D60 x H54cm

Weight 10kg

Load capacity 60kg

Finish: stained black

LUOTO climbing arches are designed in Finland and manufactured in the EU. Patented original design. KAURA cushions are designed and manufactured in Finland. Both are designed to support an active lifestyle without compromising on design or sustainability.

Please note that a slight bend will protect the joints of the climbing arch if it is used frequently. Use the climbing arch on a non-slip surface. Young children should only use the climbing arch under adult supervision.
