

Spirit Fitness Commercial CU800ENT+ ergometer

The Spirit Ergometer CU800ENT+ offers everything you could want from an ergometer. A smooth ride, ergonomic design, unforgettable entertainment and numerous options make for an effective and advanced workout experience. The solid CU800ENT+ ergometer from Spirit Fitness features a large 39.6cm touchscreen display that allows users to mirror their phone screen. It can also connect to third-party apps via Bluetooth FTMS. Through the pre-installed apps, users have the ability to keep themselves entertained with popular streaming, news and social media content.

CHF 4'490.00

The Spirit Fitness Commercial CU800ENT+ ergometer brings ease of use to indoor biking and is designed to provide a comfortable and enjoyable ride for users of all levels. The built-in heart rate sensors on the multi-position handlebars and the large 39.6cm touchscreen display make the ergometer suitable for both beginners and experienced users. The user-friendly and intuitive touchscreen console features a variety of entertainment functions, an integrated fan to keep exercisers cool and a USB port to charge mobile devices. The extra smooth ride of the Spirit Fitness Commercial CU800+ ergometer is due to the perfected gearing and integrated generator/flywheel system. The padded foot pedals are inclined inwards by 2° to bring the body into an anatomically correct position during training. The double-sprung foam saddle can be easily adjusted in height and depth.

The USB charging port, fan and user-friendly design appeal to a wide audience. The preset programs offer a variety of favorite workouts for beginners, while heart rate monitoring and custom programs are available for more experienced users. From the 40 resistance levels and numerous program options to the extra smooth ride feel, the CU800ENT+ offers everything you could want from an ergometer.

Features:

- Induction brake system
- Flywheel mass approx. 13kg with gear ratio: 9:1:1

- Training computer with 39.6 cm touchscreen display with an intuitive layout for easy navigation
- the system offers three different display modes (simple, track, dashboard) for fine-tuning the training experience
- display of revolutions/min, calories, elapsed time, remaining time, distance, resistance, METs, watts, heart rate
- 40 electronically adjustable resistance levels
- Program: Manual, Hill, Fat burn, Cardio, HIIT, Interval, 2 Heart Rate, Custom, Fit Test, Constant Power
- wireless screen mirroring - display your smartphone on the touch screen - stream Apple or Android devices directly to the 39.6 cm touch screen via a simple screen mirroring function so you can watch videos or interact with your favorite apps
- Streaming, social media and news APP - pre-installed APPS (subject to change): Netflix, YouTube, Instagram, Facebook, Twitter, Hulu, iHeartRadio, Spotify, ESPN, CNN, BBC, Weather
- WiFi compatible - easy access to selected websites and online apps on the touchscreen via the Internet
- Bluetooth FTMS for APP connection and connection to Bluetooth-compatible chest strap, headphones, speakers
- USB port for charging function and software update
- HDMI PORT
- Headphone connection 3.5mm audio-in
- Telemetric heart rate measurement (integrated pulse receiver)
- Hand pulse sensors embedded in the handlebars of the ergometer
- Vertical, stepless seat adjustment options
- horizontal, stepless seat adjustment options
- self-righting, large pedals with quick-release fastener
- pedals inclined inwards by 2° - recent sports science studies show that an inclination of the feet inwards by 2° promotes optimum muscle and ligament activity. These findings have been incorporated into the development of the CU900LED and the inclination of the pedals has also been implemented
- Q-factor 24cm
- pivoting fan
- transport wheels
- Water bottle holder
- Color: Graphite grey

Use: home to commercial use, payload: approx. 204kg

Device dimensions: L123 x W65 x H146.5cm, weight 57kg

Accessories: integrated receiver for chest strap transmitter, hand pulse sensors

Option: pulse transmitter belt (5khz and Bluetooth)

Warranty: 2-year full warranty for home use; 1-year full warranty for light institutional to commercial use

SPIRIT+ App is designed for users who like to plan their workouts, track progress and set fitness goals. With the SPIRIT+ app, users can store all their training data in one place and share training information with other fitness applications. Athletes can get instant insights during workouts and check real-time stats of their runs, walks and bike rides.

With so many different fitness apps and trackers available on the market, Spirit Fitness wants users to be able to share workout information with other third-party apps when needed. The ability to share data and connect with a like-minded fitness community is crucial for any athlete, regardless of the sport they are interested in. That's why SPIRIT+ app users can share and export their workout data with other

fitness apps such as Apple Health, Google Fit, Fitbit and Map My Fitness (connecting with third-party apps may require a subscription, which is not included in the Spirit Fitness purchase).

Connect directly to third-party FTMS apps

FTMS ("Fitness Machine Service Protocol") is the latest Bluetooth standard for wireless control of cardio fitness equipment such as treadmills, exercise bikes, rowing machines and more. Spirit Fitness has integrated FTMS into its latest product range to enhance the workout experience for users of all ability levels. Connecting to third-party FTMS apps may require a subscription that is not included with your Spirit Fitness purchase.

Zwift is an app for cyclists, runners and triathletes that makes indoor training fun. It enables athletes to achieve their fitness goals in virtual worlds designed for a global community. Two training categories are available for Zwift users: Running and Cycling. Athletes can train on treadmills, connect their stationary exercise bike or a special accessory (smart tablet and app subscription not included).

Kinomap is the world's largest geolocalized video sharing platform with thousands of videos of the world's best routes. It is a subscription-based training app that allows users to access an entire library of videos submitted by other users from around the world. Kinomap pairs with your equipment and responds to the incline and resistance as seen in the video on your screen. The app offers a wide range of compatible equipment, including treadmills, cross trainers, exercise bikes, exercise bikes and rowing machines. With such a variety of cardio workout options, users of all fitness levels will find the workout they love (smart tablet and app subscription not included).
