

## Body Solid Club Line Chest Press (SBP100)

Built to deliver strength - and it does. Structurally and biomechanically designed for intense gym use, the Chest Press' rigid body structure plays a critical role in the machine's superior handling. The large base frame supports stability and comfort and provides neutral weight distribution. Considerable rear and side subframes help eliminate lateral torsion and vibration. Kick-assist lever allows you to move the handles to comfortable start and end positions for complete pre-stretch and full range of motion without effort. Biomechanically designed for maximum chest concentration and excellent muscle development. Comfortable multi-position handles focus on specific areas of the chest and triceps. This chest press has all the essential components for a great workout experience.

**CHF 2'490.00**
