

## Body Solid Pro Calf Machine GSCR349

The Pro Calf Machine from Body Solid for efficient calf training. A combination of user-friendly ergonomic design and advanced biomechanical engineering, the Body Solid Calf Machine GSCR349 is designed to increase calf muscle interaction and accelerate development speed. This is achieved through the use of a unique foot platform design that eliminates pressure compression on the balls of the feet while providing maximum freedom of movement for deep muscle fiber penetration.

**CHF 599.00**

### Equipment:

- the weight sled is designed for a weight ratio of 1:3 (ratio 1:3)
- height adjustable leg pads
- robust frame construction
- angled footrest for maximum comfort and range of motion
- hand grips for training support
- extra strong, high-quality DuraFirm padding, tear-resistant with double stitching
- high quality ball bearing at the rotation axis (precision bearing block with sealed ball bearings)
- weight holder for 26mm discs (adapter for 51mm discs optionally available)
- color: grey
- discs not included

Use: home use to light commercial use, payload disc support 270kg

Unit dimensions: L119,3 x W58,4 x H99cm, weight approx. 42kg

Option: adapter for 51mm discs, discs

Warranty: 2 years on labor and spare parts (excluding consumables)
