

Tunturi R85W Endurance rowing machine

The Tunturi Endurance line is the flagship of the new Tunturi cardio equipment. The Tunturi Endurance treadmills, cross trainers, bikes and rowing machines combine the best overall package of versatility, price/performance ratio and quality.

CHF 1'199.00

The Tunturi R85W is a rowing machine that works with water resistance. This means that the stronger the pull, the higher the resistance. In this way, the actual dynamics of rowing are ideally transferred to the training device. The intensity of the training depends on the rowing speed and the basic resistance. The athlete can control the speed themselves, while the basic resistance is infinitely variable via the amount of water added.

The volume generated during training reaches a maximum room volume and the splashing of the rowing train has a very calming, almost meditative effect. This means that you can also train in rented apartments without disturbing the neighbors. The Dualrail is an additional feature of the Tunturi water rowing machine: It causes minimal noise thanks to careful workmanship and promises a solid motion sequence on the guide rail. In contrast to a monorail, the athlete sits balanced and stable on the gel seat of the water rower. The Tunturi Rower is also an absolute highlight when it comes to looks: the simple design speaks for itself and looks modern and practical at the same time. With proper care and careful handling, water rowers show hardly any wear and tear and are therefore very durable.

A chest strap is recommended to measure your pulse during training. The settings on the device can be made via a battery-operated display.

The Endurance Rower R85W is guaranteed for home use as well as for professional use in physiotherapies.

The integrated monochrome LCD display with its few control buttons makes this rowing machine very easy to use. It shows the time, calories burned, distance and rowing strokes per minute.

The resistance is generated purely by the water in the 17 liter container. The maximum user weight is

165 kg.

The R85W rowing machine is extremely space-saving as it can be set up vertically. For example, it can easily be stored in a corner or against a wall.

Features:

- Resistance generation through water resistance - resistance generation depends on the pull strength - the intensity of the workout is determined by your own pulling behavior
- User-friendly training computer: LCD display for training distance, training time, stroke rate, total distance, calories burned, watts, heart rate
- Tank made of shatterproof polycarbonate with a capacity of 9-17 liters
- Stainless steel water wheel
- Can be raised to save space
- Adjustable console
- comfortable, ergonomic and smooth-running roller seat
- Ergonomic handle
- adjustable footrests with foot straps
- transport castors

Use: Home use to light institutional use, payload: approx. 135kg

Device dimensions: L228 x W56 x H66cm, charging dimensions: L66 x W56 x H227cm, weight 44kg (without water filling)

Option: Transmitter belt

Warranty: **CH warranty** (warranty from Swiss general distributor) - 1 year full warranty, 2 years on labor and spare parts (excluding consumables).

Brake system: Water resistance system

Current-dependent: No

Resistance levels: Water resistance dependent

Training computer: LCD display

Displayed values: Training distance, training time, stroke rate, total distance, calories burned, watts, heart rate

Training programs: No

Pulse-controlled programs: keine

Pulse receiver: 5khz

Multimedia: No

Rail system: Monorail

Accessories: integrated receiver for chest strap transmitter

Options: Transmitter belt, floor protection mat

Foldable / erectable: Erectable

Folding / set up dimension: L 66 x W 56 x H 227 cm

Dimensions (length / width / height): L 228 x W 56 x H 66 cm

Device weight: 44 kg

Payload: approx. 135 kg

Insert: Home to light institutional use
