

Waterrower care set

WaterRower care set - for optimum care of
your WaterRower

CHF 35.00

With this accessory set you are optimally equipped for the maintenance of your WaterRower.

The WaterRower is made of high-quality solid wood, which makes our rowing machine particularly robust and resistant. And wood is a natural product, so the color of the wood can change slightly over the years with constant use. To ensure that the oiled wood retains its beautiful coloring in the long term, we recommend regular treatment with our care set.

The cotton cloths remove dust and dirt without causing annoying scratches. If small dents or scratches appear on the WaterRower, the wood can be carefully roughened with the enclosed sanding fleece and then treated with the wood care oil.

The plastic cleaner and chlorine tablets can be used to clean and maintain the plastic parts on the WaterRower and the tank.

The set contains

- 3 x cotton cloths
- 1 x plastic cleaner
- 1 x wood care oil
- 1 x abrasive fleece
- 1 x annual pack of chlorine tablets (6 tablets)
