

## FlexabandFlexaFix

Flexafix - the practical accessory for the Flexaband. Flexafix is the practical handle loop. For lengthening or shortening the gymnastic band. Practical, very easy handling. No knot formation! Ideal for fitness workout and therapy.

**CHF 7.80**

Flexafix, like FlexaClip, is a practical accessory for the gymnastic tape. It prevents knots from forming. The handle loop is connected to the flexaband in a few simple steps and can be quickly released. It is used to lengthen or shorten the gymnastic band. Extremely practical and very easy to use.

The great advantage of the Flexafix grip loop: no knot is necessary for the ring formation and gentle for the Flexaband material.

The Flexaband in 4 different strengths is together with the grip loop the perfect equipment for fitness training at home and also for use in physiotherapy or physiotherapy.

Scope of delivery: 1 pair FlexaFix without flexaband
